Kota → Dinamis
Orang → Dinamis

1. Kota → nk
 → head
 → next

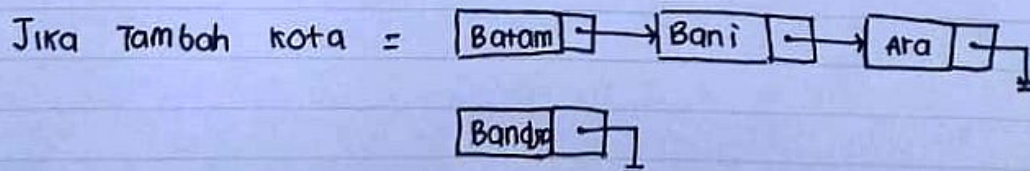

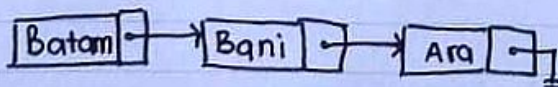

2. orang → nm
 → next

```
typedef struct tkota *addresskota ;
typedef struct tkota {
    infotype nk
    addressorg head ;
    addresskota next ;
} kota ;
```

```
typedef struct {
    address kota first ;
} Listkota ;
```

```
typedef struct tElmList *addressorg ;
typedef struct tElmList {
    infotype nm ;
    addressorg next ;
} ElmList ;
```

```
typedef struct tkota kota ;
```

Masukkan / tambah dataorg dikota Bandun =
